AI & AUTOMATION IN FINANCE

A key differentiator — actively deploying AI-driven solutions to modernise financial workflows:

- AI Reconciliation:** Automated GST (GSTR2A vs books) and 26AS reconciliation using AI tools, reducing reconciliation time by up to 70% and near-eliminating manual error.
- Automated MIS:** Implemented Excel macros and AI-assisted dashboards (Power BI + ChatGPT) to auto-generate monthly P&L, MIS, and investor reports.
- Smart Invoice Processing:** Deployed AI document-parsing to validate vendor invoices against PO/GRN, auto-flagging discrepancies before payment approval.
- Predictive Forecasting:** Applied AI forecasting models for cash flow projection, expense trend analysis, and budget variance reporting.
- Tax Automation:** Automated TDS/TCS workings and GSTR data preparation using structured ERP exports, reducing prep time by 60%.
- Process Automation:** Developed Excel VBA / Python scripts to automate payroll computation, closing stock statements, and payment requisition reports.
